

SHAHNAMEH TD

README 00 — MASTER PROJECT INDEX

Senior Game-Design, Art-Production, Development, and Business Plan

Engine: Godot 4.6

Primary platform: landscape mobile

Genre: active 2D tower-defense roguelite

Campaign: Seven Khans plus the Damavand Binding finale

Main battlefields: 8

Core visual identity: hand-painted Shahnameh-inspired Iranian epic art with strong mobile readability

1. PROJECT PROMISE

Shahnameh TD is a heroic illustrated tower-defense roguelite inspired by Ferdowsi's *Shahnameh*. The player builds a defense, moves a legendary champion, protects regions of sacred light, purifies corruption, rescues hijacked towers, drafts Fate cards, and confronts mythic bosses.

The game must not feel like a generic tower defense with Persian decorations. Its identity must appear in:

- the story structure
 - the characters and mythic ordeals
 - the shape language of towers
 - the contrast between Sacred Fire and corruption
 - the regional map design
 - the ornamental UI rhythm
 - the soundtrack and sound effects
 - the narrator presentation
 - the replayable roguelite choices
-

2. CORE PLAYER LOOP

```
read the battlefield
-> place a tower
-> react to enemy pressure
-> reposition the hero
-> earn and spend Sacred Fire
-> cleanse corruption
-> rescue threatened towers
```

- > choose a Fate card
- > defeat a mythic boss
- > unlock a discovery
- > replay with a different build

3. FIRST PRODUCTION TARGET

Build only the Khan 1 vertical slice first:

- place Archer Tower
- > defeat readable enemy group
- > move Rostam near a leak
- > notice regional corruption
- > activate Sacred Fire cleanse
- > prevent tower hijack
- > survive five waves
- > choose one Fate card
- > defeat the Lion of the First Khan
- > press replay

Do not mass-produce the full campaign until real testers voluntarily replay Khan 1.

4. PROJECT READMES

README	Purpose
README_00_MASTER_PROJECT_INDEX.md	project identity, reading order, and locked decisions
README_01_PHASE_BASED_ASSET_GENERATION.md	art direction, complete modular prompts, phase inventories, and approval gates
README_02_GAMEPLAY_VISUAL_UX_REPLAYABILITY.md	combat, maps, towers, heroes, bosses, UI, replayability, and balancing
README_03_ETHICAL_MONETIZATION_BUSINESS.md	fair revenue strategy, products, ads, pricing tests, and business roadmap
README_04_DEVELOPMENT_PRODUCTION_ROADMAP.md	Godot architecture, milestones, QA, performance, and release engineering

5. LOCKED DESIGN DECISIONS

Area	Decision
Genre	active hero-led tower defense with roguelite runs
Platform	landscape mobile first
Core battle resource	Gold
Signature resource	Sacred Fire
Signature threat	regional corruption and tower hijacking
Main campaign	Seven Khans plus Damavand Binding
Map count	8
Map progression	medium to very large
Large-map solution	layered TileMaps, active sectors, camera anchors, minimap, threat-jump navigation
Starting towers	Archer, Sacred Fire, Heavy, Control
Starting hero	Rostam
Replayability	cards, relics, routes, Forge hybrids, objectives, heroes, Pacts, Hunt, Endless, Daily Tale
Monetization	cosmetics-first, supporter pack, ad removal, limited optional rewarded ads
Forbidden monetization	paid combat power, paid loot boxes, forced ads during battle, manipulative defeat-screen offers
Production rule	prove Khan 1 gameplay before producing the full asset catalog

6. CORRECT WORK ORDER

1. Lock the visual style with Rostam, one map, one HUD, and several animations.
2. Build the Khan 1 graybox before creating the full asset library.
3. Test touch controls and battlefield readability on real phones.
4. Integrate only Phase 0 and Phase 1 assets.

5. Tune the first boss and replay flow.
 6. Prove that players understand corruption and voluntarily replay.
 7. Build the roguelite foundations.
 8. Expand the Seven Khans campaign.
 9. Add meta progression and collections.
 10. Add Hunt, Endless, Daily Tale, cosmetics, and launch content.
 11. Soft-launch with a small audience.
 12. Improve retention and clarity before increasing marketing spend.
-

7. SUCCESS TEST FOR THE FIRST PLAYABLE BUILD

A tester should be able to answer:

- What do the four starter towers do?
- Where will enemies travel?
- What is Rostam useful for?
- What does Sacred Fire do?
- What does corruption look like before a collapse?
- How do I rescue a hijacked tower?
- Why did I win or lose?
- What new decision would I try in a replay?

The most important signal is simple:

After finishing or failing Khan 1, does the player press replay without being asked?

8. NON-NEGOTIABLE QUALITY RULES

- Never sacrifice readability for decoration.
 - Never use fake Persian writing.
 - Never cover critical gameplay with particles.
 - Never make a boss only a large health bar.
 - Never create large empty maps merely to claim scale.
 - Never hide the reason for a defeat.
 - Never require spending to recover from difficulty.
 - Never generate hundreds of assets before proving the gameplay loop.
-

SHAHNAMEH TD

README 01 — PHASE-BASED ASSET GENERATION

Complete Modular Prompt System for Production Art

1. WHY THIS PROMPT SYSTEM IS MODULAR

A professional asset library should not repeatedly paste the same 50-line visual system into every prompt. Repetition increases inconsistency and makes correction difficult.

For each image-generation request, paste these sections in order:

1. GLOBAL VISUAL BLOCK
2. ONE ASSET-TYPE BLOCK
3. ONE ASSET SPECIFICATION
4. GLOBAL NEGATIVE BLOCK

Generate only one isolated asset, atlas, strip, map package, or UI screen per request.

Approve the base design first. Generate animations only after the base design is locked.

2. GLOBAL VISUAL BLOCK

Create production-ready 2D illustrated game art for SHAHNAMEH TD, a landscape-mobile tower-defense roguelite inspired by Ferdowsi's Shahnameh and Persian miniature painting.

Use the attached approved Rostam reference image as the primary visual-style anchor.

TRANSFER THE VISUAL SYSTEM, NOT ROSTAM'S EXACT COSTUME.

VISUAL SYSTEM:

- detailed hand-painted 2D game illustration
- strong dark-brown or near-black outer contour lines
- thinner controlled internal linework
- painterly cel-shading with compact shadow shapes and warm highlights
- aged bronze, antique gold, copper, leather, timber, stone, brick, textile, and parchment materials

- deep teal, lapis-inspired blue, crimson, rust red, ivory, charcoal, and controlled warm-orange Sacred Fire accents
- restrained cold-blue and shadow-violet corruption accents
- Iranian epic identity and Persian-miniature-inspired ornamental rhythm
- polished modern mobile-game readability
- elevated three-quarter gameplay perspective unless another camera angle is explicitly requested
- consistent material language, perspective, lighting, scale, and silhouette quality
- medium-high detail density without clutter
- culturally coherent heroic and mythic atmosphere

CANONICAL RULE:

When the asset is based on a Shahnameh figure, creature, episode, or location, preserve the correct narrative role, Iranian epic identity, dignity, and cultural coherence. Do not redesign it as generic Western fantasy.

GAMEPLAY-ADAPTATION RULE:

When the asset is an invented gameplay enemy, tower, prop, or effect, make it visually belong inside the same Shahnameh-inspired world without falsely presenting it as a canonical character.

3. GLOBAL NEGATIVE BLOCK

NEGATIVE PROMPT:

photorealistic, photography, 3D-render appearance, generic Western fantasy, European medieval plate armor, European castle design, Viking styling, Roman armor, samurai armor, Chinese imperial armor, science-fiction technology, cyberpunk, neon holograms, flat vector minimalism, generic cartoon, anime styling, low-detail mobile icon art, fake Persian writing, random runes, readable text, logos, signatures, watermarks, excessive spikes, oversized shoulder armor, excessive glow, excessive smoke, uncontrolled particles, blurry silhouette, weak contrast, cropped body parts, cropped weapons, cropped wings, cropped tails, duplicate limbs, broken anatomy, inconsistent scale, inconsistent perspective, inconsistent lighting, green spill, green outline, green shadow.

4. OUTPUT CONTROL PROMPTS

4.1 Review-grid version

Generate a Review Grid version of the approved isolated asset.

Requirements:

- use exact uniform chroma-key green background #00FF00
- add thin dark-gray 2-pixel grid lines
- preserve the requested canvas size
- preserve the requested grid structure
- keep every asset fully inside its assigned cell
- preserve consistent scale and camera angle
- do not add labels
- do not add text
- do not add a watermark

4.2 Transparent production version

Generate a Clean Production version of the approved asset.

Requirements:

- preserve the approved design exactly
- preserve the exact canvas size and frame positions
- remove all visible grid lines
- remove labels and text
- use a transparent RGBA background
- preserve clean anti-aliased edges
- do not add scenery
- do not add a watermark

4.3 Correction prompt

Regenerate the asset with these corrections:

- preserve the approved Shahnameh TD visual system
- match the Rostam style anchor more closely
- keep the complete asset inside every grid cell
- do not crop weapons, limbs, tails, wings, mane, or effects
- preserve identical scale across frames
- preserve the requested elevated three-quarter gameplay perspective
- remove duplicate limbs and broken anatomy
- preserve strong contour lines and painterly cel-shading

- preserve the bronze, teal, crimson, ivory, charcoal, leather, and warm-orange material system
- reduce clutter
- remove text and watermarks
- preserve the requested grid and canvas dimensions exactly

5. ASSET-TYPE BLOCKS

5.1 Isolated character, creature, hero, enemy, or boss

ASSET TYPE:

Approved isolated base design for later animation production.

TECHNICAL OUTPUT:

- produce one full-body isolated design
- transparent RGBA background
- elevated three-quarter gameplay perspective
- bottom-center pivot
- preserve safe padding around limbs, weapons, mane, tail, wings, and effects
- mobile-readable silhouette
- no scenery
- no text
- no watermark

5.2 Character or creature animation strip

ASSET TYPE:

Production-ready animation strip based on the attached approved isolated base design.

TECHNICAL OUTPUT:

- generate one animation strip only
- grid: 8 columns × 1 row
- transparent RGBA background
- preserve identical costume, face, anatomy, proportions, scale, perspective, material rendering, and lighting in every frame
- bottom-center pivot
- full silhouette visible in every frame
- no frame overlap
- no cropped body parts, weapons, tails, wings, mane, or effects
- no scenery

- no text
- no watermark

Recommended cell sizes:

Asset class	Cell size
small enemy	192 × 192
hero or companion	256 × 256
standard boss	384 × 384
final boss or very large creature	512 × 512

5.3 Tower base design

ASSET TYPE:

Approved isolated tower-family base design.

TECHNICAL OUTPUT:

- isolated full tower design
- transparent RGBA background
- elevated three-quarter top-down gameplay perspective
- bottom-center pivot
- fit inside a 256 × 256 cell with safe padding
- keep the tower base fixed and readable
- expose a clear projectile or effect origin point
- avoid baked terrain beneath the tower
- no text
- no watermark

5.4 Tower animation strip

ASSET TYPE:

Production-ready tower animation strip based on the attached approved tower design.

TECHNICAL OUTPUT:

- grid: 8 columns × 1 row
- cell size: 256 × 256 pixels
- transparent RGBA background
- fixed bottom-center pivot
- preserve tower footprint, camera angle, materials, lighting, and scale
- animate only the requested action

- full tower silhouette visible in each frame
- no baked terrain
- no text
- no watermark

5.5 Battlefield map package

ASSET TYPE:

Layered landscape battlefield map package for a mobile tower-defense scene.

TECHNICAL OUTPUT:

- use the requested logical tile grid
- tile size: 128 × 128 pixels
- landscape 16:9 overview composition
- enemy routes at least two logical tiles wide
- readable build pads
- readable enemy entrances and player gate
- readable regional-light sectors
- terrain fills the canvas
- no characters
- no enemies
- no towers
- no UI
- no readable text
- no labels
- no watermark

DELIVER SEPARATE LAYERS OR REVIEW EXPORTS:

1. clean terrain
2. visible-grid review overlay
3. enemy-path overlay
4. build-pad overlay
5. regional-light overlay
6. corruption-mask overlay
7. collision overlay
8. camera-anchor overlay
9. sector-activation overlay for large maps

5.6 Tileset atlas

ASSET TYPE:

Seamless terrain tileset atlas.

TECHNICAL OUTPUT:

- atlas grid: 8 columns × 8 rows
- tile size: 128 × 128 pixels
- total atlas: 1024 × 1024 pixels
- every tile fills its complete cell
- seamless edges and coherent transitions
- include base terrain, route surfaces, edge transitions, corners, corruption transitions, sacred-light transitions, and decorative variants
- no characters
- no enemies
- no towers
- no UI
- no text
- no watermark
- deliver one clean atlas and one visible-grid review atlas

5.7 Props or UI-icon atlas

ASSET TYPE:

Isolated atlas.

TECHNICAL OUTPUT:

- use the requested grid and cell dimensions
- transparent RGBA background
- center each item with safe padding
- preserve consistent scale and elevated gameplay perspective where applicable
- ensure strong mobile-readable silhouettes
- no labels
- no readable text
- no watermark

5.8 VFX strip

ASSET TYPE:

Animated VFX strip.

TECHNICAL OUTPUT:

- grid: 8 columns × 1 row
- cell size: 256 × 256 pixels unless otherwise specified
- transparent RGBA background
- centered effect
- clear start, expansion, peak, and dissolve progression
- mobile-readable shape language
- controlled particle count
- no scenery

- no text
- no watermark
- avoid sci-fi holograms and random runes

5.9 UI screen

ASSET TYPE:

Polished illustrated mobile UI screen and isolated UI-atlas package.

INTERFACE VISUAL SYSTEM:

- dark-charcoal foundations
- aged-bronze and antique-gold frames
- deep-teal and crimson textile accents
- ivory parchment surfaces
- restrained Persian ornamental geometry
- large mobile touch targets
- clear hierarchy
- localization-safe empty zones
- no baked text, numbers, prices, dates, or fake writing

TECHNICAL OUTPUT:

- canvas: 4096 × 2304 pixels
- landscape 16:9 mobile composition
- no watermark

DELIVER:

1. full-screen mockup
2. isolated frame atlas
3. button atlas
4. meter atlas where needed
5. alert or state atlas where needed
6. high-contrast accessibility variation

6. MAP SCALE PROGRESSION

Do not use the same battlefield size for all eight maps.

Map	Scale	Logical grid	Design intention
Khan 1 — Lion and Rakhsh	Medium	32 × 18	readable first battlefield

Map	Scale	Logical grid	Design intention
Khan 2 — Desert of Thirst	Medium	36 × 20	exposed routes and scarce relief
Khan 3 — Azhdaha Canyon	Medium-large	40 × 22	split pressure and arena threat
Khan 4 — Sorceress Feast	Medium-large	42 × 24	illusion routes and reveal mechanics
Khan 5 — Olad Camp	Large	48 × 27	branching choices and moving fronts
Khan 6 — Arzhang Fortress	Large	52 × 30	siege layers and fortress sectors
Khan 7 — White Div Cavern	Very large	56 × 32	underground sectors and visibility pressure
Damavand Binding	Very large	64 × 36	multi-anchor finale and staged sectors

Large maps must not become giant empty bitmaps. Build them from layered TileMaps and activate sectors in stages. Use camera anchors, minimap navigation, off-screen alerts, and a button that jumps to the highest-priority threat.

7. PHASE 0 — VISUAL LOCK AND TECHNICAL PROOF

Generate these assets before mass production.

7.1 Rostam base-design specification

ASSET ID:
hero_rostam

CHARACTER:
Rostam

NARRATIVE IDENTITY:
Legendary champion of Zabulistan, protector of Iran, dragon-slayer, and central heroic warrior of the Shahnameh.

GAMEPLAY ROLE:
Frontline playable hero, boss fighter, leak interceptor, and Sacred Tether amplifier.

DESIGN REQUIREMENTS:

- broad heroic silhouette
- mature commanding face and strong moustache
- practical bronze-and-antique-gold armor
- deep-teal and crimson Iranian textile panels
- leather straps and engraved bronze details
- sword, lasso, and restrained ox-headed mace
- subtle Babr-e Bayan tiger or leopard-pattern reference
- avoid Viking, barbarian, and European-knight styling

CELL TARGET:

256 × 256 pixels for later hero animations

7.2 Rostam animation specifications

hero_rostam_idle:

Eight-frame subtle breathing loop. Preserve a heroic grounded stance. Animate small chest, cloth, and weapon-settle movements only.

hero_rostam_walk:

Eight-frame forward walking loop facing screen-right. Keep lasso and weapons controlled and visible.

hero_rostam_basic_attack:

Eight-frame ox-headed-mace or sword attack. Include readable anticipation, impact, and recovery.

7.3 Prototype Battle HUD specification

UI ID:

ui_battle_hud_prototype

PURPOSE:

Validate hierarchy, mobile touch zones, and consistency with the Rostam visual anchor.

REQUIRED ZONES:

- top-left: Lives, Gold, Sacred Fire, Wave
- top-right: pause, speed, settings, cleanse
- bottom-left: hero portrait, HP, energy, skill, Tether
- bottom-center: four starter tower cards
- bottom-right: contextual tower action
- center: alert-banner safe area

IMPORTANT:

Do not show every future system at once. The vertical slice HUD must remain calm, readable, and touch-friendly.

7.4 Khan 1 map specification

MAP ID:

map_khan_01_lion_rakhsh

TITLE:

Khan 1 – Lion and Rakhsh

CANONICAL STORY ANCHOR:

Rakhsh confronts a lion while Rostam rests.

ENVIRONMENT:

Mythic Iranian woodland meadow with stylized trees, grasses, rocks, reeds, stream edges, flower patches, hero-rest area, and a central lion arena.

GAMEPLAY LAYOUT:

- enemy entrance at upper-right
- player gate at lower-left
- two-tile-wide winding path
- central 6 × 6 lion arena
- eight readable 2 × 2 build pads
- three regional-light sectors
- one Sacred Fire brazier point
- one hero-rest marker

GRID:

32 columns × 18 rows

Phase 0 approval gate

Do not proceed until:

- Rostam reads clearly at normal mobile zoom.
- Animations fit their cells without cropping.
- The map route is understandable in two seconds.
- Build pads are easy to see.
- The HUD supports one-thumb and two-thumb play.
- The player can identify Sacred Fire without reading a tutorial paragraph.

8. PHASE 1 — KHAN 1 PLAYABLE VERTICAL SLICE

8.1 Base designs

Asset ID	Subject	Gameplay role	Key design requirements
<code>companion_rakhsh</code>	Rakhsh	narrative companion and warning support	warm reddish coat, darker mane and tail, heroic stallion anatomy, restrained saddle, bronze and teal details
<code>enemy_corrupted_jackal</code>	corrupted jackal	fast runner	lean anatomy, dusty-brown fur, subtle charcoal veins, no exaggerated mutation
<code>enemy_corrupted_boar</code>	corrupted boar	early armored enemy	broad low silhouette, dark bristles, short tusks, restrained corruption
<code>boss_mythic_lion</code>	Lion of the First Khan	Khan 1 boss	believable powerful lion, tawny fur, darker mane accents, no armor or demonic mutation

8.2 Starter towers

Asset ID	Tower	Gameplay role	Design requirements
<code>tower_archer</code>	Archer Tower	fast single-target damage	Iranian-inspired timber watchtower, carved rails, bow racks, quivers, teal canopy
<code>tower_sacred_fire</code>	Sacred Fire Tower	burn, cleanse support, Sacred Fire generation	stone-and-brick brazier tower, protected flame bowl, copper ornament
<code>tower_heavy</code>	Heavy Tower	slow impact and armor break	thick masonry, bronze reinforcement, restrained ox-head motif, heavy launcher
<code>tower_control</code>	Control Tower	slow, stagger, path control	qanat-and-wind-inspired tower, cloth streamers, turquoise water channel, bronze pipe details

8.3 Tower animation states

Generate these for all four starter towers:

```
idle
attack
construction
corruption_warning
hijacked
purification
```

8.4 Character and boss animations

```
Rakhsh:
idle
run
warning_stomp

Lion of the First Khan:
idle
run
claw_attack
pounce_attack
roar
defeat

Corrupted Jackal:
run
bite_attack
defeat

Corrupted Boar:
walk
charge
defeat
```

8.5 Khan 1 terrain and props

```
tileset_woodland:
grass variants, meadow flowers, forest floor, shallow stream, stream edges,
river corners, reeds, dirt path, path turns, stone path, mossy rock ground,
cliff edges, corrupted-ground transitions, Sacred-Light transitions, decorative
variants

props_shared_vertical_slice:
1. Sacred Fire brazier
2. extinguished brazier
3. corrupted brazier
```

4. woodland rock
5. reeds
6. woodland shrub
7. small tree
8. dead tree
9. hero-rest carpet
10. broken shield
11. rope coil
12. lasso coil
13. sword in ground
14. fallen banner without text
15. gate repair material
16. Sacred stone marker

8.6 Khan 1 VFX

vfx_arrow_release:
compact bow-release flash with restrained ivory motion line and warm bronze spark

vfx_arrow_impact:
compact arrow-hit burst with dust, bronze spark, and restrained impact lines

vfx_sacred_fire_cleanser:
radial purification wave that burns away dark tendrils using warm orange, gold, ivory, and copper

vfx_region_corruption_stage_01:
subtle first-stage ground-shadow veins using charcoal, muted violet, and restrained cold blue

vfx_tower_hijack_start:
dark ribbons coil upward around an invisible tower footprint using charcoal, muted violet, and cold blue-gray

8.7 Production Battle HUD specification

UI ID:
ui_battle_hud

REQUIRED ALWAYS-VISIBLE COMPONENTS:

- Lives or gate integrity
- Gold
- Sacred Fire

- wave progress
- pause
- speed
- hero portrait
- hero HP
- hero energy
- hero skill
- four to six tower cards depending on progression
- selected-tower contextual action

CONTEXTUAL OR EXPANDABLE COMPONENTS:

- Morale
- Farr
- objective tracker
- cleanse
- brazier
- Qanat
- rewind
- Forge
- purge
- repair
- sell
- reposition
- relic details
- tower inspect panel
- boss-specific information

CENTER ALERT TYPES:

wave, objective, hijack, collapse, boss, oath, adaptation, revive, binding

RULE:

Do not show every icon continuously. Use progressive disclosure and contextual panels.

8.8 Core icon atlas

Gold
Sacred Fire
Lives
Morale
Farr
hero energy
rewind
Forge
pause
resume

speed
settings
cleanse
brazier
Qanat
Tether
upgrade
sell
repair
reposition
purge
inspect
burn
slow
stun
armor break
corruption warning
hijack
purified
boss
objective active
objective complete
objective failed

Phase 1 approval gate

Do not proceed until:

- all four towers have unmistakable roles
 - corruption is noticed before collapse
 - a hijack warning is fair
 - Rostam movement is useful but not exhausting
 - the Lion boss changes player behavior
 - the UI remains readable on a mid-range phone
 - testers replay Khan 1 voluntarily
-

9. PHASE 2 — SEVEN KHANS CAMPAIGN PRODUCTION

9.1 Playable and supporting heroes

```
hero_zal:
wise ranged-support hero with Simorgh-linked visual cues, white hair, dignified
Iranian heroic identity, tactical rescue support

hero_gordafarid:
mobile defensive hero, commanding warrior silhouette, practical Iranian-inspired
armor, strong gate-defense identity

hero_esfandiyar:
armored frontline hero with restrained invulnerability identity, disciplined
silhouette, heroic Iranian plate-and-textile design
```

9.2 Campaign enemies and bosses

```
Khan 2:
enemy_mirage_shade
enemy_salt_crust_brute
boss_manifestation_of_thirst

Khan 3:
enemy_canyon_serpent
enemy_scorched_cave_hound
boss_azhdaha

Khan 4:
enemy_illusion_attendant
enemy_feast_shade
boss_sorceress_illusion_form
boss_sorceress_revealed_fiend_form

Khan 5:
enemy_mountain_raider
enemy_mountain_archer
boss_olad_champion_form
companion_olad_guide_form

Khan 6:
enemy_div_infantry
```

```
enemy_div_brute
enemy_div_stone_thrower
enemy_div_standard_bearer
enemy_div_corruptor
enemy_div_sorcerer
boss_arzhang_div
```

```
Khan 7:
enemy_white_div_thrall
enemy_cavern_boulder_brute
enemy_cavern_corruptor
boss_div_e_sepid
```

9.3 Campaign map specifications

```
map_khan_02_desert_thirst:
36 × 20 logical grid
open mythic Iranian desert, dry channels, shade islands, mirage sectors, thirst-
pressure zones, exposed paths, scarce Sacred relief points
```

```
map_khan_03_azhdaha_canyon:
40 × 22 logical grid
rocky canyon, caves, scorch marks, branching serpent routes, central dragon
emergence zone, safe camera anchors, split-pressure sectors
```

```
map_khan_04_sorceress_feast:
42 × 24 logical grid
enchanted woodland feast clearing, deceptive beauty, illusion route overlays,
reveal-state transitions, corrupted banquet arena
```

```
map_khan_05_olad_camp:
48 × 27 logical grid
mountain camp, branching lanes, tents, barricades, elevated path choices, moving
fronts, staged active sectors
```

```
map_khan_06_arzhang_fortress:
52 × 30 logical grid
Div fortress, siege gates, layered courtyards, ramparts, banner zones, breach
sectors, camera anchors, staged progression
```

```
map_khan_07_white_div_cavern:
56 × 32 logical grid
vast cavern, underground chambers, mist, boulders, visibility pressure, lantern-
safe sectors, staged active chambers
```

9.4 Campaign tilesets

```
tileset_desert
tileset_dragon_canyon
tileset_enchanted_glade
tileset_mountain_camp
tileset_div_fortress
tileset_white_div_cavern
```

9.5 Advanced towers and Forge hybrids

Asset ID	Tower	Role
<code>tower_support</code>	Support Tower	range, speed, repair, and adjacent-tower utility
<code>tower_mystic</code>	Mystic Tower	corruption response and magical utility
<code>tower_flame_archer</code>	Flame Archer	fast burn-focused hybrid
<code>tower_volcano_ram</code>	Volcano Ram	heavy explosive anti-armor hybrid
<code>tower_qanat_weaver</code>	Qanat Weaver	slow, reposition, and route-control hybrid
<code>tower_derafsh_bastion</code>	Derafsh Bastion	morale and defensive aura hybrid
<code>tower_azar_oracle</code>	Azar Oracle	Sacred Fire economy and purification hybrid

9.6 Environmental animation set

```
env_brazier_flame
env_corrupted_brazier
env_qanat_flow
env_stream_ripple
env_desert_heat_distortion
env_sand_drift
env_dragon_scorch_embers
env_illusion_shimmer
env_fortress_banner_sway
env_cavern_mist
env_falling_cave_dust
```

9.7 Boss animation sets

```
Azhdaha:
idle, slither, bite, tail_sweep, flame_breath, rock_emergence, enraged, defeat
```

Sorceress illusion form:
idle, illusion_cast, curse_bolt, reveal_transition

Sorceress fiend form:
idle, claw_attack, shadow_wave, defeat

Olad champion form:
idle, walk, sword_combo, command_shout, nonlethal_defeat

Arzhang Div:
idle, walk, mace_attack, ground_slam, summon, rage, defeat

Div-e Sepid:
idle, walk, claw_attack, crushing_grapple, ground_slam, dark_hail,
blindness_wave, summon, enraged, defeat

9.8 Boss VFX

vfx_azhdaha_flame_breath
vfx_azhdaha_tail_sweep
vfx_azhdaha_rock_emergence
vfx_sorceress_illusion_split
vfx_sorceress_curse_bolt
vfx_sorceress_reveal
vfx_arzhang_ground_slam

10.5 Challenge-system assets

```
blood_oath_assets:  
oath frames, risk icon, reward icon, accepted state, completed state, failed  
state  
  
zahhak_pact_assets:  
pact frames, corruption-risk icon, sacrifice icon, reward icon, accepted state  
  
memory_div_assets:  
rival elite frame, adaptation icon, remembered-build warning, defeat marker
```

11. PHASE 4 — NARRATIVE, COLLECTIONS, AND META PROGRESSION

11.1 Positive-character base designs

```
Sohrab  
Giv  
Goudarz  
Bizhan  
Kay Khosrow  
Kaveh  
Fereydun  
Simorgh
```

11.2 Narrative portraits

Sam
Zavareh
Faramarz
Siyavash
Manijeh
Farangis
Rudابه
Tahmineh
Sindokht
Kay Kavus
Kay Qobad
Lohrasp
Pashotan

11.3 Collection and meta UI

ui_hero_hall
ui_tower_codex
ui_relic_collection
ui_narrators_book
ui_ancestral_forge
ui_narrative_frames

12. PHASE 5 — HUNT, ENDLESS, LIVE-OPS, AND COSMETICS

12.1 Final hunt characters

```
boss_zahhak:  
mythic imprisoned tyrant, restrained serpent-shoulder identity, Damavand-binding  
visual language, culturally coherent, not generic demonic fantasy  
  
enemy_zahhak_serpent_guard  
enemy_chainbreaker_div  
enemy_akvan_div  
enemy_afraasiyab
```

12.2 Damavand Binding map

```
MAP ID:  
map_damavand_binding  
  
GRID:  
64 × 36 logical tiles  
  
ENVIRONMENT:  
Mythic Mount Damavand finale with snow, volcanic fissures, chained anchors,  
layered cliffs, Sacred Fire points, active sectors, multiple camera anchors,  
staged reveals, and a final binding arena.  
  
GAMEPLAY:  
- multiple chain-anchor objectives  
- staged sector activation  
- off-screen threat alerts  
- minimap  
- threat-jump navigation  
- final Zahhak binding sequence
```

12.3 Damavand assets

```
tileset_damavand  
vfx_damavand_anchor_activation  
vfx_zahhak_serpent_strike  
vfx_zahhak_poison_cone
```

```
vfx_zahhak_binding_resistance  
vfx_zahhak_final_chain_seal  
env_damavand_snow_drift  
env_volcanic_embers  
env_chain_vibration
```

12.4 Mode UI

```
ui_endless_mode  
ui_hunt_for_zahhak  
ui_daily_tale  
ui_seasonal_event  
ui_cosmetic_shop  
ui_weekly_challenge  
ui_community_event
```

12.5 Cosmetic preview templates

```
cosmetic_hero_skin_preview  
cosmetic_tower_skin_preview  
cosmetic_projectile_effect_preview  
cosmetic_sacred_fire_effect_preview  
cosmetic_gate_skin_preview  
cosmetic_profile_banner_preview  
liveops_event_badges
```

Do not generate a battle-pass UI during the initial launch unless a sustainable update cadence has already been proven.

13. PHASE 6 — ACCESSIBILITY, BRANDING, RELEASE ART, AND AUDIO

13.1 Utility UI

```
ui_settings  
ui_accessibility  
ui_pause  
ui_victory
```

```
ui_defeat  
ui_simorgh_revive
```

13.2 Branding and marketing

```
branding_app_icon  
branding_logo_ornament_frame  
marketing_store_feature_graphic  
marketing_store_screenshot_frames  
marketing_trailer_storyboard
```

13.3 Loading screens

```
loading_rakhsh_lion  
loading_rostam_desert  
loading_rakhsh_warns_azhdaha  
loading_sorceress_feast  
loading_olad_guides_rostam

music_victory_theme  
music_defeat_theme
```

```
sfx_shared_ui_pack  
sfx_signature_system_pack  
ambience_map_pack
```

Audio direction:

Create an original soundtrack brief for SHAHNAMEH TD.

Use an Iranian epic and mythic atmosphere with respectful instrumental inspiration, strong melodic identity, controlled percussion, mobile-friendly clarity, and dynamic layers that support gameplay intensity.

Avoid generic Hollywood trailer music, excessive wall-of-sound mixing, modern EDM drops, and imitation of copyrighted melodies.

Deliver:

- narrative intention
- tempo range
- instrumentation direction
- calm layer
- combat layer
- boss layer where applicable
- seamless loop guidance
- transition stingers
- mobile-mix notes

14. PHASE 7 — GODOT INTEGRATION TASKS

Create implementation tasks for:

```
system_sprite_import_pipeline  
system_sprite_validator  
system_tilemap_pipeline  
system_battle_hud  
system_pardeh_break  
system_vfx_pooling  
system_audio_manager  
system_data_resources  
system_save_service  
system_liveops_config  
system_cosmetic_shop
```

```
system_analytics
system_mobile_performance
```

Required engineering rule:

Every production asset must be referenced by a stable asset ID.
Never rely on filename guessing inside gameplay code.
Use data-driven resources for heroes, enemies, waves, towers, cards, relics, maps, objectives, and cosmetics.

15. FULL ASSEMBLED PROMPT EXAMPLE — RAKHSH

Create production-ready 2D illustrated game art for SHAHNAMEH TD, a landscape-mobile tower-defense roguelite inspired by Ferdowsi's Shahnameh and Persian miniature painting.

Use the attached approved Rostam reference image as the primary visual-style anchor. Transfer the visual system, not Rostam's exact costume.

VISUAL SYSTEM:

detailed hand-painted 2D game illustration; strong dark-brown or near-black contour lines; thinner controlled internal linework; painterly cel-shading; aged bronze, antique gold, copper, leather, timber, stone, textile, and parchment materials; deep teal, lapis-inspired blue, crimson, rust red, ivory, charcoal, and controlled warm-orange Sacred Fire accents; restrained cold-blue and shadow-violet corruption accents; Iranian epic identity; polished mobile-readable silhouette; elevated three-quarter gameplay perspective.

CANONICAL RULE:

Preserve the correct Shahnameh narrative role, Iranian epic identity, dignity, and cultural coherence.

ASSET ID:

companion_rakhsh

ASSET TYPE:

Approved isolated base companion design for later animation production.

CHARACTER:

Rakhsh

NARRATIVE IDENTITY:

Rakhsh is Rostam's loyal, brave, intelligent horse and an important companion in

the Shahnameh.

GAMEPLAY ROLE:

Companion, mobility support, warning animation, and Khan 1 narrative asset.

DESIGN REQUIREMENTS:

- believable heroic stallion anatomy
- warm reddish coat
- darker mane and tail
- expressive eyes
- powerful legs
- restrained heroic saddle
- bronze details
- deep-teal textile accents
- no monster features
- no excessive armor

TECHNICAL OUTPUT:

- one full-body isolated design
- transparent RGBA background
- elevated three-quarter gameplay perspective
- bottom-center pivot
- safe padding around legs, mane, and tail
- compose for later 256 × 256 animation cells
- no scenery
- no text
- no watermark

NEGATIVE PROMPT:

photorealistic, photography, 3D render, anime, generic cartoon, generic Western fantasy, European knight styling, Viking styling, fake Persian writing, text, logos, watermark, excessive armor, cropped body, cropped tail, broken anatomy, duplicate limbs, blurry silhouette, inconsistent perspective.

16. FINAL ASSET QA CHECKLIST

Style

- Does the asset match the Rostam visual anchor?
- Are contour lines and cel-shading consistent?
- Does it belong in the same illustrated world?

Cultural coherence

- Is the design recognizably Iranian-epic-inspired?
- Did the generator accidentally add generic Western fantasy?
- Is all fake writing removed?

Gameplay readability

- Is the silhouette recognizable at mobile scale?
- Are enemies distinguishable by behavior?
- Are build pads and routes readable?
- Are VFX controlled enough to preserve tactical clarity?

Technical quality

- Are transparent edges clean?
- Are pivots consistent?
- Do animations stay inside cells?
- Are map layers separable?
- Are UI touch targets large enough?
- Are asset IDs stable?

Production discipline

- Was the asset approved before animation production?
- Is the asset actually needed for the current milestone?
- Has it been tested inside the game rather than judged only as an isolated image?
